SUMMARY

Computer Engineering student (graduating 2027) with strong foundations in Python, Java, JavaScript, and Data Structures. Experienced building full-stack applications, improving API performance, and contributing to open-source codebases with 30+ developers. Skilled in writing clean, maintainable code across React, Node.js, and Django.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C

Backend: Node.js, Express.js, Django, REST APIs

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Databases: MySQL, MongoDB, PostgreSQL

CS Fundamentals: DSA (arrays, strings, stacks, queues, linked lists), OOP, Algorithms

Tools & DevOps: Git, GitHub, Docker, Postman, VS Code

Cloud: AWS (EC2, S3), Google Cloud Platform

PROJECTS

ResumeFit — ATS-Friendly Resume Builder [GitHub](#) | Tech: React.js, TypeScript, Tailwind CSS, Node.js

- Built a production-ready resume builder with dynamic templates, secure REST APIs, and one-click PDF export reducing user formatting time by ~70%.
- Designed an accessibility-focused UI and optimized component rendering, achieving sub-200ms load time for template switching.
- Deployed with Node.js backend; integrated PDF generation library handling 50+ concurrent export requests without errors.

Zoomies & Snuggles — Pet Adoption Platform [GitHub](#) | Tech: React 18, TypeScript, Tailwind CSS, MongoDB

- Developed a full-stack pet adoption platform with multilingual UI supporting 3 languages and an optimized MongoDB schema serving 100+ users.
- Implemented server-side filtering and pagination, reducing average API response time by 40% compared to client-side filtering.
- Built responsive UI components with React 18 concurrent features, improving Lighthouse performance score to 91.

MediBot — AI Medical Chatbot [GitHub](#) | Tech: Python, Django, SQL, ML libraries

- Built an NLP-powered medical chatbot using Django and SQL, improving symptom-matching response accuracy by 35% over baseline rule-based system.
- Designed modular backend with optimized SQL queries (reduced query time by 25%) and clean REST API endpoints consumed by the frontend.
- Integrated 3 ML models for intent classification; deployed using Django REST framework with 99.5% uptime in testing environment.

EXPERIENCE

Open Source Contributor — GirlScript Summer of Code (GSSoC) | Remote | Oct 2024 – Dec 2024

- Contributed to 5+ open-source repositories alongside 30+ developers; submitted 12 merged pull requests fixing bugs and adding features.
- Reduced codebase bug count by 20% across contributed projects through systematic debugging, code review participation, and regression testing.
- Collaborated asynchronously using Git workflows (branching, rebasing, PR reviews) in a distributed team environment.

COMMUNITY INVOLVEMENT

Volunteer — DevFest 2025 (GDG Rajkot): Provided technical support and coordination for 200+ attendees at Google Developer Group annual event.

Active Member: Google Developer Groups (GDG Rajkot), Google Cloud Developer Community, FFGD Rajkot

EDUCATION

B.E. Computer Engineering | Gujarat Technological University (GEC Rajkot) | 2023 – 2027 | CGPA: 8.0 / 10

CERTIFICATIONS

Postman API Fundamentals Student Expert | Postman | Oct 2024

Responsive Web Design | freeCodeCamp | Sep 2024

LANGUAGES

English (Professional) | Hindi (Professional) | Gujarati (Native)
